

Table of Contents

- ▶ **Chapter 1** - Power System Dynamic Equilibrium, Power-Flow, and Steady-State Stability
Peter W. Sauer and M. A. Pai
- ▶ **Chapter 2** - Fast Computation of the Steady-State Stability Limit
Savu C. Savulescu
- ▶ **Chapter 3** - Practical Aspects of Steady-State Stability Assessment in Real-Time
José Santos Vergara P., Tran Anh Thai, Nguyen Duc Cuong, Horia S. Campeanu, and Savu C. Savulescu
- ▶ **Chapter 4** - Composite Approach for the Early Detection, Assessment and Visualization of the Risk of Instability in the Control of Smart Transmission Grids
Roland Eichler, Chris O. Heyde, and Bernd O. Stottok
- ▶ **Chapter 5** - Preventive and Emergency Control of Power Systems
Daniel Ruiz-Vega, Louis Wehenkel, Damien Ernst, Alejandro Pizano-Martínez, and Claudio R. Fuente-Esquivel
- ▶ **Chapter 6** - Online Dynamic Security Assessment
Jorge L. Jardim
- ▶ **Chapter 7** - Practical Issues for Implementation of Online Dynamic Security Assessment Systems
Lei Wang, Xi Lin, Fred Howell, and Kip Morison
- ▶ **Chapter 8** - The Case for Using Wide-Area Monitoring and Control to Improve the Resilience and Capacity of the Electric Power Grid
Jay Giri, Manu Parashar, Rene Avila-Rosales, and Douglas Wilson
- ▶ **Chapter 9** - Emergency Monitoring and Corrective Control of Voltage Instability
Thierry Van Cutsem and Costas Vournas
- ▶ **Chapter 10** - On-Line Voltage Security Assessment
Costas Vournas and Thierry Van Cutsem
